DETAILED ACTION

After the amendment filed 12 December 2003, claims 21, 23, 26-28 and 30-43 are currently pending in the instant application, are allowable over the prior art of record and have been renumbered as claims 1-19.

Terminal Disclaimer

The terminal disclaimer filed on 12 December 2003 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US Patent No. 6,316,636 has been reviewed and is accepted. The terminal disclaimer has been recorded.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance. This invention relates to a process for the synthesis of a fluorocarbon compound comprising reacting: a hydrocarbyl compound containing an sp^3 -hybridized halophoric carbon atom bearing at least two halogen atom substituents at least one halogen atom having an atomic number greater than that of fluorine and said halophoric carbon atom being bonded to at least one chalcogen: with a halogen or halogen base complex and the reaction of the hydrocarbyl compound of formula (II) with a halogen reactant. The novel and nonobvious aspect of this invention involves the reactants and the compound of the formula (II). The closest prior art of record, US Patent No. 4620040, which discloses processes for the preparation of trifluoroanisoles comprising reacting hydrogen fluoride fails to teach or suggest the use of a halogen or a halogen base complex. Also, the

closest prior art of record fails to disclose the reaction of a halogen reactant with the compound of formula (II).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
